## WORK EXPERIENCE

### Frontend Engineer

Banxware

10/2022 - 02/2023

Berlin, Germany

Embedded Lending Platform for Small and Medium-sized Enterprises, offering real-time feedback for loan applications.

#### Achievements/Tasks

- Implemented the internal Backoffice tool for management of Loan Application lifecycle, written in Typescript and React.
- Developed, tested and monitored robust features since very early stages of the application, up until the go-live stage.
- Worked in a cross-functional team, including product managers and designers, to understand project requirements and deliver quality results.
- Collaborated with the maintenance of the Jira board and hosting of the daily standups and retrospective sessions for our team.

### Front End Web Developer

GoQR

11/2021 - 09/2022

Berlin, Germany

Reputation management service for business owners. Currently on POC stage.

#### Achievements/Tasks

- Implemented features for the admin dashboard using Typescript, React and Bootstrap.
- Led the migration from Bootstrap to Styled Components.
- Actively contributed to our team working with Scrum methodologies.
- Contributed to a fully-remote async team using PR reviews as the main tool for code quality and team collaboration.

### Customer Service Specialist

N26 Operations

09/2019 - 09/2021

Berlin, Germany

#### Achievements/Tasks

- Focused on complex cases, requiring proactive communication with different departments within the organization.
- Maintained high performance consistently, exceeding targets by over 5% above the market averages in all KPIs.
- Provided shadowing sessions and mentorship to the newest colleagues within our team and external contact centers.

AWS Lambda

Node.js

GraphQL

## PERSONAL PROJECTS

### AI Avatar Generator

- Fullstack application made using Next.js, tRPC, Prisma and Tailwind, deployed on AWS. The application will generate avatars based on UI prompts and store them in the DB for future download and community showcase. Integrates Stripe for credits purchase.

### Urban Fashion (Ecommerce website)

- Fully-featured Ecommerce website, including shopping cart, ordering, Stripe payments. Currently building an admin dashboard and CMS.

### DofusLab - Open Source Contributions

- The project is carried out using NextJS with Typescript for the Frontend, as well as Flask and PostgreSQL for the backend.
- Notable maintainer of DofusLab - An open source tool for the game Dofus with a daily average of 800 active users. I have developed one of the core features of the website, user profiles.

## COLLABORATION

### Scrimba Discord Community

- Active member of Scrimba's Discord Community, providing help to newer developers following Scrimba's curriculum, answering Javascript and React questions mostly.
